UI Design

Work Experience

Application and Server Administrator at TATA CONSULTANCY SERVICES

Jun, 2022 - Present

Customer service, working under pressure, problem-solving. Active Directory was used as support among other applications provided by the company.

This project is for a Company in California, so all of the interaction is in English.

IT Support and Junior Developer at AMQ

Jul, 2021 - Jun, 2022

I completed 2 projects: A training website developed using HTML5, CSS, PHP, JS, and an SQL database. The website allows users to upload various types of materials such as documents, PDFs, MP4 files, etc. It includes user management with session control and credential creation.

A warehouse management system created in Java 8 with SQL. This system registers products and generates QR codes for effective tracking. It also includes control for product inputs and outputs, i also used SQL as main DB to storage this info, using the the DB provided by their host, so the use of the connectors were needed.

Project Developer

2018 - Present

I created a Facial Recognition in MatLab, competing in the engineering fair at "ITQ".

I've also participated in some CRUD projects as web developer, using frameworks, Laravel, Angular 9 & 12.

While using Angular 12, i used services to connect with Java Bean and use the controllers created there, the usage of API'S in order to send an URL to generate a Report of the Data given.

The creation of the Web Design for web pages, using bootstrap, CSS...

Education

Master's Degree in Astrophysics

Universidad Politécnica de Querétaro

2023 - present

Still in course

Computer Stystems Engineer

Universidad Politécnica de Querétaro

2019 - 2022

Programming Technician

CecyteQ

2016 - 2019

Python Certified from Basic to Professional

Universidad Politécnica de Querétaro

2020 - 2021
